
Work Experience

Finderly | *Software Engineer (Part Time)**Sep 2025-Present*

- Built text & live video AI Agent using Vercel AI SDK & LiveKit, for users to plan, track and complete DIY projects.
- Refactored monolithic legacy pages into reusable React components & setup Jest test suite across full stack.
- Migrated Node.js backend from JavaScript to TypeScript, enforcing strict typing across shared API contracts.

L3Harris Technologies | *Technical Project Manager (Robotic Process Automation)**August 2023 - Present*

- Developed AI enabled PM tooling to automatically generate documentation, reducing project prep time by 60%.
- Managed deliverables as technical liaison on projects serving 45k employees, generated \$300k+ annual savings.
- Deployed & monitored Blue Prism bot processes and application servers across dev, test and prod environments.

Strategic Retirement Partners | *Software Engineer (Freelance)**April 2024 - October 2024*

- Shipped a responsive 401k data projection/visualization web app using TypeScript, React, and Material UI, enabling advisors to deliver accessible, personalized retirement insights that increased client participation 10%.
- Designed accessible/ form flow and interactive charts built with TypeScript, React, Material UI & Tailwind CSS.

501Database | *Software Engineer Intern**April 2023 - August 2023*

- Owned customer intake flow & admin tool in Next.js used by 20+ non-profits for 20% faster sign-in experience.
- Integrated the frontend with two RESTful backend microservices, enabling dynamic, user-specific form field generation and seamless data submission across the platform.

L3Harris Technologies | *Business Analyst**November 2021 - August 2023*

- Owned \$1.5 million per year in contract initiations & renewals for software procured from 25+ vendors.

Education

Colgate University | *BA, Computer Science - Magna Cum Laude**September 2017 - May 2021*

Featured Projects

AFCHub (afchub.vercel.app) - *Arsenal FC fan dashboard with live news, stats & squad/player performance data*

Next.js, TypeScript, Tanstack Query, TailwindCSS

- Per-route caching, parallel API fetching, & error handling with fallback UI for minimum latency & maximum UX.
- Built fully responsive layouts with skeleton loading states and seamless behavior across breakpoints.

Code for Boston Liquor Licenses (license2succeed.org) - *Make liquor license applications accessible for all.*

React, TypeScript, TailwindCSS, react-intl, React-Aria

- Developed React/TS components (Filterable Table, Card, Button) with focus on reusability and a11y.
- Collaborated with designers in Figma to implement specs & iterated on PRs through structured code reviews.

ER-404 (er-404.com) - *Retro music hardware emulation & full featured beat-maker in the browser.*

Tone.js, React, TypeScript, TailwindCSS, Framer Motion

- 3D UI/UX with animated knobs, sliders and faux physical displays for sound selection, visualization & fx control.
- Complex audio playback state management handled in React via custom hooks and multiple context providers.

Klarr (klarr.app) - *Bauhaus design inspired productivity dashboard.*

React, TypeScript, Node.js, MongoDB Atlas, Firebase, TailwindCSS, Framer Motion

- Full drag-and-drop interface using native HTML drag API with layout animations for fluid, fully responsive UX.
- Google Auth & custom database management scripts for seamless background data refresh.

Skills: React, React Native, TypeScript, JavaScript, Next.js, Jest, HTML, CSS, RESTful APIs, Git, TailwindCSS, Responsive Design, Accessibility, Node.js, Python, SQL, AWS, Testing, Agile, LLM Integration, Context Engineering, Claude Code
